

Replic8 - Redefining Customer Experience

by OneClick Technologies

Orchestrating effective and enriching customer experiences.

Global Industry leaders have entrusted us to successfully and consistently process millions of satisfactory customer interactions annually.

Our expertise in customer experience enables our clients to deliver a transformational experience to their customers and a fraction of the cost.

Our organization is ISMS ISO/IEC 27001:2013 and PIMS ISO/IEC 27701:2019 compliant.

Productivity enhanced by

30%

Decrease in operational cost by

15%

Reduction of escalated calls by

46%

Improved first call resolution for

480K callers monthly

* As per our customer case studies.

Customer Experience Solutions

Increase in Need of Advanced CX Platform with Self-help

The emergence of customer experience (CX) has disrupted the way companies are connecting with their customers. Erstwhile, most people contacted customer service by telephone. Just a decade ago, smartphones were in their early days, social media was largely for amusement, and using email for contacting companies was unconventional.

Today, with digital channel uptake steadily increasing, a new and increasingly valuable role is emerging for customer experience platforms. Gartner predicts that customer experience is one of the most critical components for a firm to achieve its competitive differentiation in today's times. However, many companies experience numerous challenges in the area of customer experience transformation:

Increase in Costs: A TCS article states that it costs \$600 billion per year to field the 270 billion calls made annually to the world's customer contact centers.¹

Inconsistency in Customer Experiences: According to a PWC report, right now, there is a mismatch between customer expectations and how employees deliver. The report also tells:

- 46% of all consumers will abandon your brand if employees are not knowledgeable.
- Only 38% of consumers in the U.S. and 46% of consumers in the outside U.S. say the employees they interact with understand their needs.²

The answer lies in empowering the customers with a self-help platform and making the agents more skilled. According to Harvard Business Review, across industries, 81% of customers attempt to take care of matters themselves before reaching out to a live customer service representative.³

The pandemic is also changing how consumers feel about customer experience. According to CCW Market Study, COVID-19 has accelerated digital adoption; 82% of consumers now feel more comfortable using digital channels for at least some issues.⁴
